

# If you smell gas in your home, follow these steps

**✓ 1. NO FLAMES OR SPARKS**

Immediately put out all smoking materials and other open flames. Do not operate lights, appliances, telephones, or cell phones. Flames or sparks from these sources can trigger an explosion or a fire.

**✓ 2. LEAVE THE AREA IMMEDIATELY**

Get everyone out of the building or area where you suspect gas is leaking.

**✓ 3. SHUT OFF THE GAS**

Turn off the main gas supply valve on your propane tank if it is safe to do so. To close the valve, turn it to the right (clockwise).

**✓ 4. REPORT THE LEAK**

From a neighbor's home or other nearby building away from the gas leak, call your propane retailer right away. If you can't reach your propane retailer, call 911 or your local fire department.

**✓ 5. DO NOT RETURN TO THE BUILDING OR AREA**

until your propane retailer, emergency responder, or qualified service technician determines that it is safe to do so.

**✓ 6. GET YOUR SYSTEM CHECKED**

Before you attempt to use any of your propane appliances, your propane retailer or a qualified service technician must check your entire system to ensure that it is leak-free.

**Since there is a possibility of odor loss or problems with your sense of smell, you should respond immediately to even a faint odor of gas.**
